SUSTAINABLE UNINTER

- According to the environmental rules and legislations related to environmental preservation in all its activities and departments the Grupo Educacional Uninter proposes the following:

Apply the environmental preservation and conscious consumption principles in the decision making processes taken by Grupo Educacional Uninter regarding the acquisition and contracting of services as well as regarding the suppliers' environmental evaluation.

Formally include the environmental preservation and conscious consumption premises in the pedagogical proposal within those several undergraduate and graduate courses that directly or indirectly deal with natural resources.

Develop teaching, research, and extended learning activities that guarantee, inside and outside Grupo Educacional Uninter, the breeding of citizens committed to environmental preservation and conscious consumption among employees and students.

Establish and implement managing aware and professional training programs for administrative staff as well the faculty within Grupo Educacional Uninter focused on environmental preservation and conscious consumption.

Prioritize the use of the lowest possible toxicity level goods within the administrative, academic, research and extended learning activities.

Stimulate the development of awareness projects focused on natural resources protection. Also develop workshops and some literature on socio-environmental responsibility by IBGPEX.

Stimulate the study and
consumption of energy produced
from renewable sources in order
to avoid waste.
